

## CSC Prerequisite Flowchart

Applies to 2015-16, 2016-17, 2017-18 major catalog

~ depending on your grade in MTH 123, you may take MTH 130 next, or MTH 230 in place of MTH 231.

\* 12-14 CSC elective credits; this consists of either three 400-electives = 12 credits, or two 400-electives and two 200-electives = 14 credits. You may sub. one additional upper-level MTH course (beyond the two that you will take after MTH 232) for one 400-elective. This is limited to one instance.

# after MTH 232, you complete two upper level MTH courses, which have MTH 232 or higher as a prerequisite (excluding MTH 306). See your advisor for recommendations, though you may choose the courses.

\*\* pre-requisites are senior class standing and ENG 151.

You must earn a minimum "C" or higher grade in CSC courses which are pre-requisites to other CSC courses.

If your major catalog year is 2015-16, 2016-17, or 2017-18, one of your CSC electives must have a database component: CSC 226, 315, or 424 fit this criteria. CSC 315 is considered a 400-elective per dept. chairperson.

If you are on the 2018-19 or later major catalog, please reference that flowchart.
